Roof Avalanche

In the case of roof avalanche danger the inner courtyard will be closed to traffic. There is no entitlement for an alternative parking space in the immediate vicinity. Also no reimbursements.

Traffic Resolutions

To ensure that traffic flows smoothly during the construction and dismantling periods and during the events itself, the rules intended to regulate and direct traffic must be strictly observed.

German Road Traffic Regulations - StVO - apply throughout the exhibition grounds and on the parking areas belonging to the exhibition grounds. The maximum permitted speed on the exhibition grounds is 10 kph.

Illegally parked vehicles, semi-trailers, containers, receptacles and empty packaging of all kinds will be removed at the expense and risk of the owner. The instructions of the persons appointed by MFN to direct and regulate traffic must be strictly complied with, and any corresponding information must be observed.

During the construction and dismantling periods only delivery vehicles are allowed to enter the exhibition grounds - against a deposit. These vehicles are to be unloaded as soon as possible and to be removed from the exhibition grounds. Cars are to be parked on the allocated parking areas. MFN reserves the right to make alterations.

Further deliveries during the event can be made against a deposit. It is forbidden to stay overnight on the exhibition grounds except on the specifically designated caravan sites at P East 2.
